

# QUICK START

For those of you who never look at a user guide (*I am one of you*) at the very least have a quick look at this page, it may save you some heartache.

If you have '*created a new product*', '*checked for updates*', gave the '*project a name*' then here we go...

**1** Add your pics

**2** Right click to: rotate, remove, etc

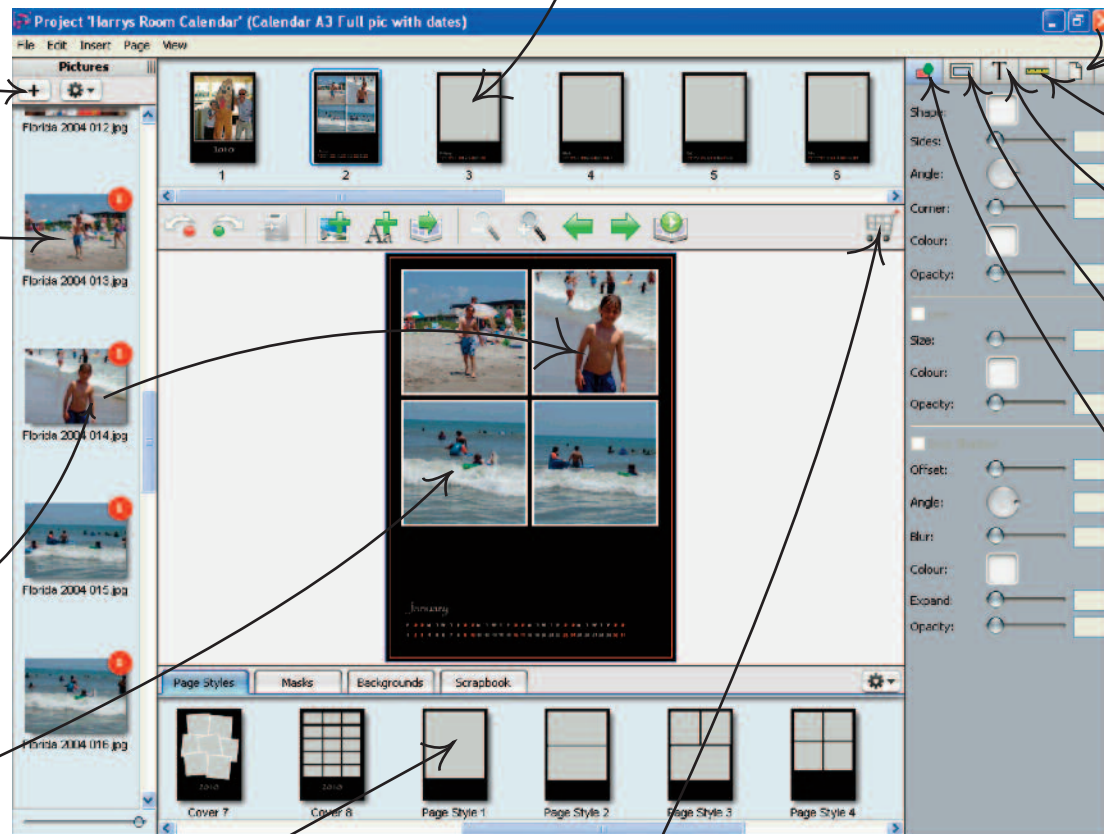

**3** Drag & drop the page style onto the page - note the cover has already been done (top left of screen). Same Drag & drop applies to Masks, Backgrounds & Scrapbook. Months of the year can be found in Scrapbook.

**4** Drag & drop pics

**5** Double click image to adjust position & Right click for more options.

**6** Click to go to next page

**7** The other nifty icons:

More page backgrounds

Position, Size, Offset & Scale

Some text options but you get more basic ones if you double click a text box

Orientation, Colour & Vignette

Shapes, Borders & Drop Shadows

**8**

**9**

**57**

Most important - order!

Right click on PC=  
ctrl click on MAC
